

# Hardware Engineer (f/m/d)

19.08.2019

## Your responsibilities

- > Design and development of hardware components for electronic toll collection, ITS and digitalization solutions.
- > Hardware architecture and circuit design for analog, digital and radio frequency circuits.
- > Verify designed components to meet requirements
- > Support approvals, industrialization and lifecycle management of hardware products
- > Create simulations, develop algorithms and software to support design and verification of hardware
- > Create design documentation

## Your profile

- > Master degree in electrical engineering or similar
- > At least 3 years hardware engineering experience in a professional environment or excellent academic results
- > Experience with radio systems (w.g.: Bluetooth LE, WLAN)
- > Preferred: basic programming skills in Matlab, Labview and C++
- > Preferred: Experience in radio frequency design
- > Passion to drive collaboration across distributed locations, stakeholders and deliver high-quality results
- > Flexibility and willingness to travel

## Our offer

- > An interesting full-time position with high responsibility within one of our growing markets
- > A hands-on onboarding with an experienced team to get familiar with the business and domain-related processes
- > An international working environment and exciting challenges with room for new ideas
- > A market compliant gross salary – minimum € 45.000 p.a. - according to your qualifications and your job experience
- > Ongoing professional education and training measures
